

Operating System Assignment

Topic: Operating System Information, Windows, Linux, macOS Installation and OS Settings

Task 1 – Windows System Information

- 1 Open **System Information** on Windows.
- 2 Press **Win + R**, type **msinfo32**, and press Enter.
- 3 Take a screenshot showing OS version, processor and RAM.

Task 2 – Bootable Linux USB

- 1 Download an official Ubuntu or Fedora ISO.
- 2 Use **Rufus** or **BalenaEtcher** to create a bootable USB.
- 3 Back up USB data first, then take a screenshot of the completed process.

Task 3 – macOS Settings

- 1 Open **System Settings** on macOS or a suitable macOS virtual machine.
- 2 Change the wallpaper.
- 3 Open **General** → **Language & Region** and add/change Hindi or Gujarati.
- 4 Take screenshots of the changes.

Task 4 – Ubuntu and Gamer Account

- 1 Install a fresh Ubuntu copy on a computer or virtual machine.
- 2 Create a user account named **gamer**.
- 3 Enable automatic login if required and take a screenshot showing the username.

Task 5 – Windows 10 Installation Guide

- 1 Prepare official Windows 10 installation media and boot from USB.
- 2 Select language, time and keyboard, then choose **Install Now**.
- 3 Choose the required edition and **Custom: Install Windows only** for a clean installation.
- 4 Select the correct partition carefully; back up important data first.
- 5 Complete setup, run Windows Update, install drivers and review privacy/security settings.
