

Day 1 – Peripherals

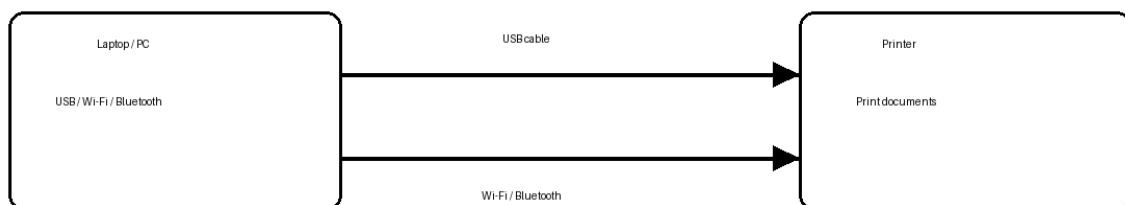

Name: Nilesh Patidar

Topic: Printers, Scanners, Webcams and Connections

1. Types of Printers, Scanners and Webcams

Device	Type	Use
Printer	Inkjet	College assignments and photos
Printer	Laser	Office documents
Printer	Thermal	Bills and receipts
Scanner	Flatbed	Scanning documents and photos
Scanner	Sheet-fed	Scanning many pages
Webcam	USB webcam	Online class and video calls
Webcam	Laptop webcam	Meetings and online study

2. Printer Connection Diagram

A printer can be connected to a computer using USB. Some printers also support Wi-Fi or Bluetooth.

3. Connection Interfaces

Connection	Advantage	Disadvantage
USB	Easy and reliable	Cable is needed
Wi-Fi	No cable; more than one device can connect	Wi-Fi setup is needed
Bluetooth	Easy wireless connection	Works only over a short distance

4. How I Would Connect a Printer to My Laptop

1. First I will switch on the printer.

2. I will connect the printer to the laptop using a USB cable.
3. I will wait for Windows to detect the printer.
4. I will open Settings and go to Bluetooth & devices → Printers & scanners.
5. I will click Add device and select my printer.
6. If Windows asks for a driver, I will install it.
7. Finally, I will print a test page.

Conclusion

Printers, scanners and webcams are useful computer peripherals. USB is useful for a simple wired connection, while Wi-Fi and Bluetooth can be used without a cable.
